-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the rack" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Carbone et al (US 4,458,466) in view of Richmond (US 3,070,280).

Carbone teaches a flexible package 12 comprising a back plastic sheet having a front and rear surface; a top edge engageable with a rack 40; a perforation 30 separating the top edge from a remainder of the back plastic sheet; a front plastic sheet having a front and rear surface and attached at side and bottom edges and not at a top edge to corresponding edges of the back plastic sheet with the rear surface of the front plastic sheet adjacent to the front surface of the remainder of the back plastic sheet to form a pouch therewith, the front plastic sheet sized so that the top edge of the front plastic sheet is below the perforation of the back plastic sheet to leave a flap portion of the remainder of the back plastic sheet that may fold over the edge of the front plastic sheet to cover the top edge of the front plastic sheet and so that the front surface of the flap portion may fold about the front portion of the front plastic sheet to touch at a contact

Art Unit: 3727

area near the top edge of the front plastic sheet. Carbone does not teach at least one resealable adhesive strip positioned on the contact area to resealably hold the flap portion closed against the front plastic sheet.

Richmond teaches it is known to provide at least one resealable adhesive strip positioned on a contact area between a front sheet and back sheet flap to resealably hold the flap portion closed against the front plastic sheet.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the teaching of at least one resealable adhesive strip positioned on the contact area to resealably hold the flap portion closed against the front plastic sheet. Doing so ensures the bag remains closed until it is desired to open it and the contents remains therein.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Herring et al is cited for teaching a pad of bags having a back sheet with a flap and at least one adhesive strip for engaging a bag front sheet.

5. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703) 872-9306. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

6. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:
